

Plant Stands and Work Benches

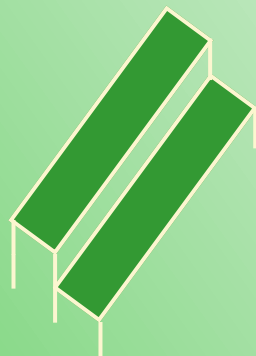

3 Tier Plant Stand

Aussie Shade Houses Plant Stands and Work Benches are made of all Australian products, that have been designed to stand up to Australian conditions. They are also manufactured in Australia, so we can guarantee our workmanship on our entire range. Plant Stands and Work Benches are neat, tidy, and maintenance free and are designed to last. Plant Stands and Work Benches are made from UV stabilised class 12 pressure pipe, that are joined using specially designed fittings. The entire frame goes together with nothing more than a rubber mallet. Once the frame is assembled, simply place the steel shelving on, and your Plant Stand or Work Bench is complete. You just have to add the plants!!

Plant Stands are available in 3 different models, either 1, 2, or 3 tier. Each tier is 0.3m deep, 1.25m wide, and 0.3m tall. Work Benches contain two shelves, one above the other. Work Bench's are 0.5m deep, 1.25m wide and 0.9m high, and can also come with a 1.25m return to create a corner unit.
